Ball Rollers with Spring Plunger Function

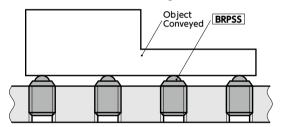

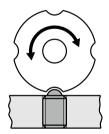

• Usage example When there is unbalanced weight.

For indexing, etc. Use as a spring plunger.

- These are set screw type ball rollers with spring plunger function.
- Their internal springs receive loads evenly even when the load is unbalanced.
- These rollers can also be used as a general spring plunger with ball for fixing and locating workpiece. The smooth rotation of the ball reduces friction between the main ball and receiving side.

BRPSS-S —All Stainless Steel BRPSS-N -Main Ball: Polyacetal

• These ball rollers have drain holes and are intended for food production lines and other applications that require cleaning.

Application

FPD production equipment, semiconductor devices, food production lines, and packaging lines

Material/Finish

		F Itolia
	BRPSS-S	BRPSS-N
Main Body	SUSXM7 (S.S. Grade: A2)	SUSXM7 (S.S. Grade: A2)
Main Ball	SUS440C (Hardness 55HRC or Higher)	Polyacetal/White
Sub Ball	SUS440C (Hardness 55HRC or Higher)	SUS440C (Hardness 55HRC or Higher)
Casing	SUS304	SUS304
Spring	SUS631J1	SUS631J1
